- Light Shows

The 'Tribute to Light' is based on the way tree absorbs light to create natural growth. This intertwined with the numerical increases inherent in the golden ratio and a social concept of performance, gathering and celebration, has evolved into a solar sculpture that will facilitate change and growth for those that engage with it. Incorporating a positive use for collected energy, a space for social interaction between students and a suggested renovation and incorporation of the Tennyson Memorial plaque. The 'Tribute to Light' will provide an eye catching and productive space that will benefit the university.
